

The Confirmation Email is not sent

sort List user seller admin in users page in dashboard

Reset links to password through admin dashboard

whatsapp bot working number

products in admin dashboard i can see there full details

flash sales admin control in dashboard

selling application + confirmation email + number+ dashboard + Login data + activation or still pending & type of account & it's Level

Affiliate program upper fixed banner + confirmation email + number+ dashboard + Login data + activation or still pending & type of account & it's Level

Verified or not to all Types of accounts

All user/ Customer options or data available

color and sizes must be selected

saved addresses for each time

In COD why pending payment it should be processing then confirmed then Shipped then delivered (order system)

in user getting why the data they sign in with in blank and doesn't appear

Track order with order number and can be done in user dashboard in view details of the order

number of Favourites appears under Favourite heart shape.

start selling next to sign in should work and all start selling should see create or login as seller only not customer

all types of email doesn't work

Approve sellers doesn't work

Change seller Forum and add Social media Links, pages Logo
